## 2 <br> Alongside your family during ups and downs

We understand life is full of uncertainties and there are ups and downs. Commitment, Protection Booster and Saving Booster provide 2 core benefits: Death Benefit and Saving Benefit to help you support your loved ones at all times, providing security during both joyful and difficult moments in life.

The Saving Benefit helps to realize your commitment by making sure your loved ones have the support to achieve their dreams as planned. To illustrate, if the insured, who is the person protected under the policy, is alive at the end of Accumulation Term, we will pay the Saving Benefit to the policy owner as follows:

At the end of Accumulation Term and the insured is alive:

|  | Commitment ${ }^{3}$ | Protection Booster | Saving Booster |

## 0 Policy Continuation Benefit provides Guaranteed Saving Amount to support you in delivering your promise

Be prepared for unforeseen circumstances so you can still deliver your promise. In the unfortunate event that the insured passes away, the Death Benefit of Commitment, Protection Booster (if any) and Saving Booster (if any) will be paid and the Protection Booster (if applicable) and Saving Booster (if applicable) will be terminated. The Policy Continuation Benefit ${ }^{5}$ of Commitment will then activate and the Saving Benefit of Commitment will be paid at the end of Accumulation Term.

## 4. Flexibility in delivering your commitment

You are the one who knows the needs of your family the best. Commitment provides 2 types of settlement methods. The policy owner can choose the Saving Benefit to be paid in lump-sum at the end of Accumulation Term or by monthly or annual instalment within 2-10 years after the end of Accumulation Term to fit the family needs.

## Remark:

5 Once the Policy Continuation Benefit becomes effective, the policy will be prohibited from surrender, withdrawal, loan, changes of beneficiary or any other non-financial changes (if applicable) of the policy.

##  Emergency relief during financial hardship

Commitment provides emergency financial relief during difficult times throughout the premium payment term. If you are unable to pay the premium within the 31-day grace period, the Reduced Paid-Up option ${ }^{6}$, if elected, will take effect to ensure the policy remains in force. However, all policy benefits will be reduced according to a predetermined scale to prevent any policy lapses.

## 6. (10) <br> Accidental Death Benefit for extra protection

To ensure your loved ones is well protected even in face of adverse events, if the death of the insured is caused by an accident, in addition to the Death Benefit, Commitment will pay an Accidental Death Benefit at the death of the insured that equals to its Guaranteed Saving Amount.

## Remark:

6 The Reduced Paid-Up option is applicable when the total premiums of the $2^{\text {nd }}$ policy anniversary (for 5 years limited pay) or $5^{\text {th }}$ policy anniversary (for regular pay) are fully paid. Upon exercising Reduced Paid-Up option, Protection Booster (if any) and Saving Booster (if any) will be terminated. Guaranteed Saving Amount of Commitment will be reduced accordingly and no Reversionary Bonus will be declared. Any accumulated Reversionary Bonus of Commitment credited to this Policy before it is converted to a Reduced Paid-Up insurance will remain unaffected. Terminal Bonus of Commitment will continue to be declared annually but at an amount based on the reduced Guaranteed Saving Amount of Commitment. You may request to reinstate to the original policy before Reduced Paid-Up within 2 years after the effective date of Reduced Paid-Up. For details, please refer to the policy provision.

## Important Information:

## Bonus Philosophy

Life insurance involves the transfer of risk from an individual to a life insurer, and the pooling of risks across large groups of policies. With participating insurance, a portion of these risks is borne by the policyholders or shared between the policyholders and the insurer. In return, policyholders may receive policyholder bonuses in the form of reversionary/terminal/special bonuses. These bonuses are not guaranteed and can vary from year to year.
In general, bonuses on these policies reflect the experience, over time, of the group to which they belong. Bonuses will typically vary based on the performance of a number of factors, with the investment return*, including the impact of asset defaults and investment expenses, normally being the main determinant of bonus performance. Other factors^ include, but are not limited to, claims experience, taxes, expenses and policyholder persistency experience.
Favourable and unfavourable experiences may be smoothed out over time to provide more stable bonuses to policyholders. For products with a terminal/special bonus feature, adjustments to terminal/special bonus scales pass through experience normally with less smoothing applied.

The bonus allocation process seeks to achieve reasonable equity among groups of policies and among policies issued at different times, to the extent practicable. Upon declaration of reversionary bonus or pay-out of terminal/special bonus to policyholders, shareholders will also be entitled to a share of the distribution.

At least annually, the Board of Directors of Sun Life Hong Kong Limited determines the amount of bonus to be declared or paid to participating policyholders. This determination is based on the advice of Sun Life Hong Kong Limited's appointed actuary, who applies accepted actuarial principles and practices. Management of participating business is also governed by Sun Life Hong Kong Limited's internal policies, as well as advice by the internal Par Governance Committee.

* Investment return includes investment income and changes in asset value of the backing portfolio. Performance of the investment return is affected by interest earnings and other market risk factors including, but not limited to, interest rate or credit spread movements, credit events, price fluctuations in non-fixed income assets, and foreign exchange fluctuations. Please see the Investment Philosophy for more details on the investment policies, objectives and strategy in relation to the investments of the backing portfolio.
$\wedge$ Claims experience represents the experience of mortality and morbidity. Persistency experience includes policy lapse/maturity and partial surrender experience; and the corresponding impact on investments. The expense factor includes maintenance expenses only, where it is charged to the participating fund at the level Sun Life Hong Kong Limited expects to be required over the foreseeable future. Policyholders will share the impact of any changes, over time, to the expected level of expenses required for the then foreseeable future. Any deviations on a year to year basis of the expenses actually incurred from the then expected level required, will be absorbed by the shareholders.
Please refer to Sun Life Hong Kong Limited's website (www.sunlife.com.hk/dividendhistory_eng) for bonuses fulfillment ratios details.

## Investment Philosophy (Policies, Objectives, and Strategy)

The investment strategy supporting this product is intended to optimize long-term value to the policyholders with a suitable level of risk; and to achieve the main objective of delivering a fair chance of meeting the illustrated non-guaranteed benefits in addition to the guaranteed benefits.
The assets supporting the investment strategy span a diversified range of fixed income assets such as sovereign bonds, corporate bonds and corporate loans; as well as non-fixed income assets which are equity-like investments and may include public equities, private equities and so on. The credit portfolio largely invests in investment grade fixed income instruments. A small quantity of below investment grade assets may be present in the portfolio due to unexpected credit rating downgrades. However, exposure to below investment grade assets is controlled by the credit risk limits and investment policies.

The current long-term target mix for the assets supporting this product is shown below:

| Asset Class | Commitment and Protection <br> Booster Target Asset Mix | Saving Booster <br> Target Asset Mix |
| :--- | :---: | :---: |
| Fixed Income Assets | $50 \%-70 \%$ | $30 \%-50 \%$ |

We invest globally to achieve geographical diversification benefits and intend to have a higher relative allocation in the US and Asia-Pacific. Diversifying between asset classes results in a more stable investment return over the long term. The actual asset mix percentages and geographical allocation may fluctuate depending on market conditions, diversification needs and economic outlook.
We may pool the investment returns with other long term insurance products with similar plan features (excluding investment linked assurance schemes and pension schemes) to optimize the investment performance and the return will subsequently be allocated with reference to the target asset mix of each products.

If the currency of the fixed income assets is not in the same currency as the underlying policies, appropriate hedging instruments (where available) is generally used to minimise impacts from fluctuating foreign exchange rates. For non-fixed income assets, there is greater investment flexibility to invest in those assets that are not denominated in the same currency as the underlying policies thereby providing diversification in risks and markets. Derivatives may be used to hedge against market risks but are not intended to bring the risk profile beyond established risk tolerances.
The investment strategy noted above may be subject to change, subject to a rigorous internal review and approval process. We will notify the policyholders upon any material changes.
