Value | Factsheet as of 31 March 2026

This is a marketing communication. Please refer to the offering documents before making any final investment decisions.

Risk Considerations

INVESTMENT INVOLVES RISKS. The value of the Fund can be volatile and investors may not get back the amount originally invested. Past performance is not indicative of future results.

- Templeton Global Fund invests principally in equity securities of companies in any country.
- The Fund is subject to market risk, equity risk, emerging markets risk, foreign currency risk, liquidity risk, counterparty risk, Chinese market risk, convertible securities risk, Europe and Eurozone risk and derivative instruments risk.
- Security lending may involve the risk that the borrower may fail to return the securities lent out in a timely manner and the value of the collateral may fall below the value of the securities lent out, which may result in a substantial loss to the Fund.
- The Fund may at its discretion pay dividends out of the capital or out of gross income of the Fund while paying all or part of the Fund's fees and expenses out of the capital of the Fund, which results in effectively paying dividends out of capital. Payment of dividends out of capital amounts to a return or withdrawal of part of an investor's original investment or from any capital gains attributable to that original investment. Any distributions involving payment of dividends out of the Fund's capital or payment of dividends effectively out of the Fund's capital (as the case may be) may result in an immediate reduction of the net asset value per share.
- Investors should not invest based on this marketing material alone. Offering documents should be read for further details, including the risk factors. Before you decide to invest, you should make sure the intermediary has explained to you that the Fund is suitable to you.

Past performance does not predict future returns.

Glossary

Comparator: Benchmark is used for comparing Fund performance, but is not a constraint to Fund Investment. **Weighted Average Market Capitalization:** A determination of a company's value, calculated by multiplying the total number of company stock shares outstanding by the price per share. For a portfolio, the value represents a weighted average based on the stocks held. **Price to Book:** The price per share of a stock divided by its book value (i.e., net worth) per share. For a portfolio, the value represents a weighted average of the stocks it holds. **Price to Earnings (12-Month Trailing)** is the share price of a stock, divided by its per-share earnings over the past year. For a portfolio, the value represents a weighted average of the stocks it holds. **Price to Cash Flow:** Supplements price/earnings ratio as a measure of relative value for a stock. For a portfolio, the value represents a weighted average of the stocks it holds. **Standard Deviation:** Measure of the degree to which a fund's return varies from the average of its previous returns. The larger the standard deviation, the greater the likelihood (and risk) that a fund's performance will fluctuate from the average return. **Charges:** For a comprehensive list of the types of costs deducted from fund assets, see the offering documents.

Important Information

Effective 16 June 2017, the FTIF - Franklin Global Growth and Value Fund merged into the FTIF - Templeton Global Fund.

This fund meets the requirements under Article 8 of the EU Sustainable Finance Disclosure Regulation (SFDR); the fund has binding commitments in its investment policy to promote environmental and/or social characteristics and any companies in which it invests should follow good governance practices.

This classification does not represent the fund is authorised as a Green or environmental, social and governance (ESG) fund in Hong Kong. Please visit the full list of SFC-authorised ESG funds at: <https://www.sfc.hk/en/regulatory-functions/products/list-of-esg-funds>.

This material is intended to be of general interest only and should not be construed as investment advice. It does not constitute legal or tax advice and it is not an offer for shares or an invitation to apply for shares of the Luxembourg-domiciled SICAV Franklin Templeton Investment Funds (the "Fund" or "FTIF"). For the avoidance of doubt, if you make a decision to invest, you will be buying units/shares in the fund and will not be investing directly in the underlying assets of the fund.

Franklin Templeton ("FT") provides no guarantee or assurance that the Fund's investment objective will be attained. The value of shares in the Fund and income received from it can go down as well as up, and investors may not get back the full amount invested. **Past performance is not an indicator or a guarantee of future performance.** Currency fluctuations may cause the value of a Fund's investments to diminish or increase.

FT shall not be liable to any user of this document or to any other person or entity for the inaccuracy of information or any errors or omissions in its contents, regardless of the cause of such inaccuracy, error or omission. Any opinions expressed are the author's at publication date and they are subject to change without prior notice. The sub-funds of FTIF are notified for marketing in multiple EU Member States under the UCITS Directive. FTIF can terminate such notifications for any share class and/or sub-fund at any time by using the process contained in Article 93a of the UCITS Directive. Franklin Templeton International Services S.à r.l. – Supervised by the Commission de Surveillance du Secteur Financier.

Performance information is based on the stated share class only, in Fund Currency, NAV to NAV, taking into account of dividend reinvestments and capital gain or loss.

When performance for either the portfolio or its benchmark has been converted, different foreign exchange closing rates may be used between the portfolio and its benchmark.

Benchmarks: The **MSCI All Country World Index-NR** is used for performance comparison purposes. It is not used as a constraint on how the Fund's portfolio is to be constructed nor set as a target for the Fund's performance to beat. The **MSCI ACWI Investable Market Index-NR** is used as a proxy for the universe, for the purpose of the ESG rating comparison.

Hedged share classes will attempt to hedge the currency risk between the base currency of the Fund and the currency of the share class, although there can be no guarantee that it will be successful in doing so. In some cases, investors may be subject to additional risks.

This document has not been reviewed by the Securities and Futures Commission in Hong Kong or Monetary Authority of Macao in Macau.

This document is intended to be of general interest only. Distribution of this document may be restricted in certain jurisdictions: the document may not be used other than by the distributors in Macau and master agent in Taiwan. For Macau, those funds are not domiciled in the Macau Special Administrative Region ("SAR") and that the regulatory standards may differ from those applicable in the Macau SAR. This document should not be construed as individual investment advice or offer or solicitation to buy, sell or hold any shares of fund or security. **Investment involves risks.** Past performance is not an indicator or a guarantee of future performance. The investment returns are calculated on NAV to NAV basis, taking into account of reinvestments and capital gain or loss. The investment returns are denominated in stated currency, which may be a foreign currency other than USD and HKD ("other foreign currency"). US/HK dollar-based investors are therefore exposed to fluctuations in the US/HK dollar / other foreign currency exchange rate. Please refer to the offering documents for further details, including the risk factors.

The data, comments, opinions, estimates and other information contained herein may be subject to change without notice. There is no guarantee that an investment product will meet its objective and any forecasts expressed will be realized. Performance may also be affected by currency fluctuations. Reduced liquidity may have a negative impact on the price of the assets. Currency fluctuations may affect the value of overseas investments. Where an investment product invests in emerging markets, the risks can be greater than in developed markets. Where an investment product invests in a specific sector or geographical area, the returns may be more volatile than a more diversified investment product.
